                                                                                                                                                                                                                                              A Zabel U., Weeger M., LA M., Schmidt H.H.;

"Human soluble guanylate cyclase: functional expression and revisionaryme family.";

It soenzyme family.";

Biochem. J. 335:51-57(1998).

C -!- CATALYTIC ACTIVITY: GTP = 3',5'-cyclic GMP + diphosphate.

C -!- ENZYME REGULATION: ACTIVATED BY NITRIC OXIDE IN THE PRESENCE MAGNESIUM OR MANGANESE IONS.

C -!- SUBUNIT: HETERODIMER OF AN ALPHA AND A BETA CHAIN.

C -!- SUBCELLULAR LOCATION: Cytoplasmic.

C -!- MISCELLANEOUS: THERE ARE TWO TYPES OF GUANYLATE CYCLASES: SOL FORMS AND MEMBRANE-ASSOCIATED RECEPTOR FORMS.

C -!- SIMILARITY: BELONGS TO ADENYLYL CYCLASE CLASS-4/GUANYLYL CYCL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Q02108; 043843;

CATALTYTC ACTIVITY: GTP = 3',5'-cyclic GMP + diphosphate.

SUBUNIT: DIMER (PROBABLE).

SUBCELLULAR LOCATION: Cytoplasmic (Potential).

TISSUE SPECIFICITY: HEAD, WHERE IT IS PREFERENTIALLY EXPRESSED IN THE CNS AND THE RETINA. NOT FOUND IN BODIES.

SIMILARITY: BELONGS TO ADENYLYL CYCLASE CLASS-4/GUANYLYL CYCLASE.

RESULT 13
               CYCLASE ACTIVITY ON BINDING OF ANF.

-!- CATALYTIC ACTIVITY: GTP = 3',5'-cyclic GMP + diphosphate.
-!- SUBCELLULAR LOCATION: Type I membrane protein.
-!- MISCELLANEOUS: THERE SEEM TO BE AT LEAST THESE AND RECEPTORS: TWO WITH GUANYLATE CYCLASE ACTIVITY (ANP-A AND ANP-B) AND ONE (ANP-C) WHICH IS PROBABLY RESPONSIBLE FOR THE CLEARANCE OF ANP FROM THE CIRCULATION WITHOUT A ROLE IN SIGNAL TRANSDUCTION.
-!- SIMILARITY: SOME SIMILARITY WITH CONSERVED REGION OF CATALYTIC DOMAIN OF PROTEIN KINASES.
-!- SIMILARITY: BELONGS TO ADENYLYL CYCLASE CLASS-4/GUANYLYL CYCLASE
                                                                                                                                                                 MEDILINE-91352095; PubMed-1679239;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     FUNCTION: RECEPTOR FOR ATRIAL NATRIURETIC PEPTIDE. HAS GUANYLATE CYCLASE ACTIVITY ON BINDING OF ANF.
CATALYTIC ACTIVITY: GTP = 3',5'-cyclic GMP + diphosphate.
SUBCELLULAR LOCATION: Type I membrane protein.
MISCELLANEOUS: THERE SEEM TO BE AT LEAST THREE ANP RECEPTORS: TWAITH GUANYLATE CYCLASE ACTIVITY (AMP-A AND ANP-B) AND ONE (AMP-CWITCH IS PROBABLY RESPONSIBLE FOR THE CLEARANCE OF AMP FROM THE CIRCULATION WITHOUT A ROLE IN SIGNAL TRANSDUCTION.
SIMILARITY: BELONGS TO ADENYLYL CYCLASE CLASS-4/GUANYLYL CYCLASE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1038
